Technology

Travelers Technology unit is dedicated to progressive, Canadian based high tech companies. Our team has the expertise to offer solutions and services in a fast growing and ever-changing environment. The customer benefits from precise products and services that address their insurance and risk management needs.

When a high tech company chooses Travelers in Canada as its insurance partner, it taps into our capacity for the most sophisticated of risks, and has the security that we are financially solid and able to respond to claims.

Travelers Technology team is aware of the special requirements of the fast-paced industry. Our mandate is 'clients come first'. As one of the first companies to take on risks associated with technology specialists, we have been underwriting high tech accounts since the 1960's. We build long-term relationships with insurance brokers and policyholders

We recognize that working internationally is becoming more the rule than the exception. Thus, Travelers and our partnered companies offer master controlled policies and coordinated claim service to manage risk in more than 60 countries. Or closer to home, when the policyholder's business takes them into the United States

Foreign Risk Services
