Equipment breakdown

Our market-leading equipment breakdown expertise

As our world becomes even more technologically dependent, understanding the equipment which drives our world - and so many businesses - is becoming essential. To your business, keeping that equipment operating is critical.

Aviva is a market leader in equipment breakdown insurance in Canada. Guided by one of the best Engineering Departments in the business, we've become the market of choice for low- to mid-hazard risks. Our engineers also provide guidance to our brokers and other business partners and, of course, to our clients on equipment exposures, be it the tried and tested kinds of equipment which has worked for 100 years, or newer electronic technologies found in so many of our risks today.

With a staff of 15 engineering specialists across Canada, who perform loss prevention and claims services, and a centralized group of experienced equipment breakdown underwriters, Aviva's Engineering Department continues to provide our brokers and customers with in-depth knowledge and expertise.
